

# HUMAN PAPILOMAVIRUS ASSOCIATED CANCERS

Most Human Papillomavirus (HPV) associated cancers can be **prevented with vaccination**. Nearly all adults will be exposed to HPV in their lifetime. Most will never know they have been infected.

**Idaho Goal: 80% vaccination rate of Idahoans aged 13-17 by 2025.**

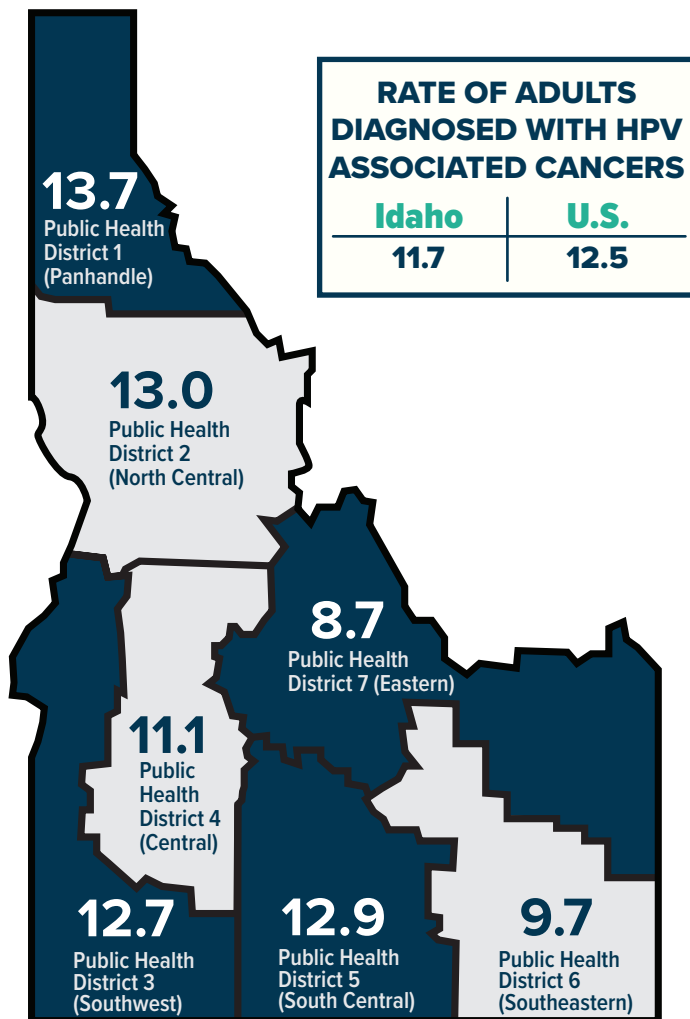

## HPV Vaccination Rate Trends

% 13-17 year olds up-to-date on HPV immunization

## HPV-ASSOCIATED CANCERS

Incidence 2017-2021 (rates per 100,000)

## CALL TO ACTION

- Protect your child before they are exposed to cancer-causing infections.
- HPV vaccination is recommended for boys and girls starting at age 9.
- Recommend the HPV vaccination along with other immunizations, not as a separate recommendation.
- HPV vaccination is cancer prevention!
